India

SUMMARY

A motivated and detail-oriented **Unity game developer with over six months experience creating** 3D games and applications using Unity and C#. Highlights skills in developing interactive game-play and a 3D endless runner game in Unity, 3D modeling, and C# **scripting**. Wiling Loirning.

I buily bock in a second year of B.Tech in Computer Science AIML program, fond passionate in learn new technologies, enthusiamistg in creating engaging gaming experiences aosiso negenring-gamers.

EXPERIENCE

Unity Developer Intern

College Game Project Rocket Booster

- Contributed to the development of 3D endless runner game with an addictive, fast-paced gameplay loop.
- Crafted and optimized 3D environments, obtectes, and pickups for performance and visual appeal.
- Implemented C# scripts for player movement, obstacle behavior, and collectible interactions.

PROJECTS

✓ Rocket Booster

Developed a 3D spaceship flying game where players navigate through multiple levels of obstacle-filled space environments while colleecting power-ups and avoiding hazards.

Implemented smooth flight controls, designed challenging levels with asteroid fields and moving obstacles, Added audio effects for immersive gameplay experience.

✓ 3D Cube Runner Game

Created a 3D endless runner game using Unity and C#, where player control, a flying cube to dodge obstacles while speed progressively

SKILLS

- ✓ Unity
- 3D Development
- ✓ C# Programming
- 3D Modeling
- ✓ C++

EDUCATION

Pursuing B.Tech in Computer Science AIML

2024 - Present: India

- ✓ Artificial Intelligence
- ✓ Machine Learning
- ✓ Data Structures & Algorithms
